1986 PRELIMINARY
ACREAGE, YIELD, PRODUCTION & VALUE

ORIGINAL

FRESH MARKET VEGETABLE PRODUCTION DOWN 2 PERCENT BUT VALUE UP 9 PERCENT

Production of the 10 principal fresh market vegetables and melons estimated in 1986 totaled 214 million hundredweight (9.69 million metric tons), 2 percent less than in 1985, according to the Agricultural Statistics Board. The crop was harvested from 1.05 million acres (426 thousand hectares), 2 percent less than the area harvested in 1985.

The 10 principal vegetables and melons harvested during 1986 had a total value of 3.20 billion dollars, a 9 percent increase over the previous year.

PROCESSING VEGETABLE PRODUCTION DOWN 2 PERCENT

Processing vegetable production totaled 12.2 million tons (11.1 million metric tons) in 1986, down 2 percent from last year. Total value of \$1.05 billion dropped 11 percent from 1985.

Harvested area for the 5 principal crops (snap beans, sweet corn, cucumbers for pickles, green peas, and tomatoes), at 1.24 million acres (501 thousand hectares), was down 11 percent.

FRESH MARKET VEGETABLES

Production of the 10 principal fresh market vegetables and melons for 1986 was 214 million cwt (9.69 million metric tons), down 2 percent from 1985. The crop was harvested from 1.05 million acres (426 thousand hectares) and had a value of 3.20 billion dollars.

Harvested acreage decreased in 1986 for broccoli, carrots, celery, sweet corn, lettuce and onions. Sweet corn, lettuce, and onions showed the largest acreage decreases at 7500, 16/20, 7620 acres, respectively.

All crops increased in value except asparagus, and broccoli. The price for both crops declined from 1985 to 1986.

LEADING FRESH MARKET STATES

The five leading States in production of fresh vegetables and melons during 1986 in order of total output were California, Florida, Arizona, Texas, and Oregon accounting for 78 percent of the production. California, Florida, Arizona, Texas and Michigan accounted for 73 percent of the harvested area. California, Florida, Arizona, Texas and New York accounted for 82 percent of the value of the 10 fresh market vegetables and melons estimated in the United States.

LEADING FRESH MARKET VEGETABLE STATES IN 1986

RANK	HARVESTED AREA		PRODUCTION		VALUE	
	STATE	PERCENT OF TOTAL	STATE	PERCENT OF TOTAL	STATE	PERCENT OF TOTAL
1	CALIF	45.6	CALIF	50.7	CALIF	48.6

PROCESSING VEGETABLES

U.S. processors received 12.2 million tons (11.1 million metric tons) of raw product from nine vegetable crops in 1986. This is down 2 percent from last year and 4 percent below 1984.

Tonnage of all vegetable crops, except tomatoes for processing, declined in 1986. Green peas were down 28 percent; broccoli was down 26 percent; cauliflower dropped 19 percent; and asparagus fell 14 percent. Snap beans were off 13 percent; cucumbers for pickles were down 8 percent; carrots slipped 5 percent; and sweet corn was 4 percent below 1985 output. Tomatoes produced 3 percent more in 1986 than in 1985.

The nine processing crops were valued at \$1.05 billion, 11 percent below last year. Prices were generally down, except for cauliflower.

The leading processing States in 1986 were: California, Wisconsin, Minnesota, Oregon, and Ohio. These five States accounted for 82 percent of the production, 71 percent of the acreage harvested, and 74 percent of the value of the five principle processing crops (snap beans, sweet corn, cucumbers for pickles, green peas, and tomatoes).
